

Prompts — Lab 01: Plan the Story with a Single AI Agent

Agent: ChatGPT (or Claude / Gemini) — one AI agent. Paste each prompt as written; change only what the lab tells you to.

PROMPT A — creative brief

You are a video producer for Kopi & Coins. Read the two attached files.

Write a one-page creative brief for Episode 1, "The Rainy-Day Tin", as Markdown with these headings: audience, the one message, platform and format (9:16, 60 seconds), tone, story logline, characters, call to action, must include, must avoid.

Rules: general money education only. No product names, no promised returns, no numbers we cannot source. Ask me up to three questions before you write if anything is unclear.

PROMPT B — the 60-second script

Using the approved brief, write the script for Episode 1.

Six scenes, timed to exactly 60 seconds:
hook (0-5s), set-up, turn, choice, payoff, end card (55-60s).

For each scene give: time range, what we SEE, voice-over or dialogue, on-screen text, and sound (music cue or effect).
Keep spoken lines short – under 140 words in total.
End card: "Start your rainy-day tin this payday." plus the disclaimer from the studio brief.

PROMPT C — script review for edits

Review script-v1 as a video editor before production.

Make a table, one row per scene: scene, what the scene must make the viewer feel, the edit types it needs (for example cut, cutaway or B-roll, match cut, montage, J or L cut, text overlay, speed ramp, transition, music cue), and why each edit serves the story.

Then list two scenes where a different edit would be stronger, and say what you would change.

PROMPT D — quality-issue forecast

For the same six scenes, forecast the quality issues we are most likely to meet when an AI video agent makes this episode.

Group them as: technical (picture and sound), AI generation (for example face drift, extra fingers, garbled text), story and continuity, and compliance (music rights, disclaimer, misleading money claims).

For each issue give the scene, how we would notice it, and one way to prevent it in the prompt or the edit.
