

Hands On Labs for Agentic AI for Video Creation

These eight Hermes-native labs form one connected journey from installation and MiniMax M3 configuration to prompt engineering, video tools and skills, custom brand production, multi-agent Kanban review, private YouTube upload and controlled scheduling.

#	Lab	Alignment	Primary output
1	Set Up Hermes Desktop and Connect MiniMax M3	Topic 1	setup-evidence.json and redacted diagnostic screenshot
2	Prompt Hermes to Create a Simple Video	Topic 1	simple-video.mp4, shot-plan.json and ffprobe.json
3	Engineer Video Prompts with FRAME-CUT	Topic 1	prompt-pack.json and prompt-score.csv
4	Install Video Tools and Hermes Skills	Topic 2	tool-routing.json and skill-smoke-test.json
5	Create a Custom Branded Video Skill	Topic 2	custom-video.mp4, brand-review.json and render-evidence.json
6	Build the Multi-Agent Video Workflow	Topic 3	multi-agent-plan.json and four verified handoff records
7	Orchestrate Kanban Review and YouTube Upload	Topic 3	kanban-export.json, approval-ledger.json and private-upload receipt or dry-run preview
8	Schedule Controlled Video Publishing with Hermes Cron	Topic 3	cron-preview.json and operations-ledger.csv

Connected workflow

Hermes setup -> MiniMax M3 -> FRAME-CUT prompt -> tool and skill routing -> custom branded video -> specialist agents -> Kanban review and private upload -> paused cron release

Current product terms

Hermes Desktop is downloaded from <https://hermes-agent.nousresearch.com/desktop>. MiniMax M3 details are at <https://www.minimax.io/models/text/m3>. Trial availability, duration, quota and region terms are time-sensitive: confirm the live offer in the learner account at sign-up and record the result in Lab 01.
