

--- name: higgsfield-shot description: Prepare and optionally execute an approved Higgsfield shot request. version: 1.0.0 metadata: hermes: category: video tags: [video, governed-production] ---

higgsfield-shot

When to use

Use this skill only when the requested video task matches the description and all source assets are authorized.

Procedure

1. Validate the FRAME-CUT prompt and asset rights.
2. Create a request preview without consuming quota.
3. Ask for approval before a paid generation call.
4. Record generation ID, prompt version and review result.

Safety and verification

- Preview commands and paid or external side effects before execution.
- Never store credentials in SKILL.md, scripts, prompts or render logs.
- Write versioned outputs and verify the final media with ffprobe.
- Return BLOCKED when a required service, asset, right or approval is unavailable.
