remotion-video

When to use

Use this skill only when the requested video task matches the description and all source assets are authorized.

Procedure

1. Read the approved video specification and input props.
2. Preview the composition and compare durationFrames divided by fps to duration_s.
3. Render a versioned MP4.
4. Run ffprobe and write render-evidence.json.

Safety and verification

- Preview commands and paid or external side effects before execution.
- Never store credentials in SKILL.md, scripts, prompts or render logs.
- Write versioned outputs and verify the final media with ffprobe.
- Return BLOCKED when a required service, asset, right or approval is unavailable.
